- Have you moved to Oracle Sales Cloud recently?
- Or considering moving to Oracle Sales Cloud?
- Using Corporate Google Mail?

If your answers to the above are yes, potentially you have below situations

- Multiple views of customer communications
- Need to initiate workflow & actions on customer communications
- Delayed or missed business responses
- Daunting task of manually managing all above

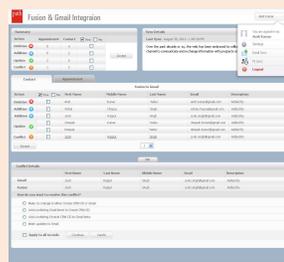

We have a pre-packaged solution integrating Oracle Sales Cloud & Google Mail to manage all of the above situations for you. This solution is offered in two modules: - PIM Gmail and Email-on-Demand

**PIM Gmail** is a web-based utility that provides the user with bi-directional synchronization of their contacts and appointments between Oracle Sales Cloud and Gmail in a scheduled manner. This utility can run automatically in the background or can run on-demand.

**Email-On-Demand** is web-based utility to provide quick response to end-users by processing synchronization of emails between Gmail and Oracle Sales Cloud in a synchronous mode. This utility provides synchronization of rich text emails with images by creating activities in Oracle Sales Cloud and providing links to uploaded attachments.

### PIM Gmail

- ✓ Sync Contacts & Appointments between Gmail and Oracle Sales Cloud
- ✓ Unidirectional and Bi-directional Synchronization
- ✓ Automated scheduled or manual modes of synchronization
- ✓ User can choose to Add, Delete, Modify
- ✓ Resolve conflicts easily
- ✓ Option to choose from multiple calendars
- ✓ Segregate personal and official contacts
- ✓ Java-based web-utility hosted on web/integration server

### Email on Demand

- ✓ Syncs rich text, images and attachments on an email to Oracle Sales Cloud
- ✓ Syncs up to 5 MB of email size as an activity with links to attachments
- ✓ Provides users with a UI to select emails to Sync
- ✓ Automatically schedule sync with Oracle Sales Cloud
- ✓ Provides option to search for Contact and Account in Oracle Sales Cloud
- ✓ Provides the ability to create tasks and appointments in Oracle Sales Cloud
- ✓ Java-based web-utility hosted on web/integration server
