Migration of Application from Oracle 6i to 11g Weblogic without Changing any Functionality

Remfry & Sagar had a challenge to migrate application from Oracle 6i to 11g Weblogic without changing the functionality of the system. Path provided the perfect solution which led to migration without disturbing the process in a short span of time.

Customer:
Remfry & Sagar Consultant Pvt. Ltd.
Gurgaon, Haryana, India
http://www.remfry.com

Industry:
Legal

Technology Used:
Oracle D2K

Remfry & Sagar is one of the pioneers in the law industry in India. Established in 1827, they have their head office in England. Remfry & Sagar are in to the business of Intellectual Property & Corporate law. They have global presence and a clientele of over 5000. In India, they have their offices in Gurgaon, Mumbai & Chennai.

Business Challenge

Remfry & Sagar was using a third party application that was centrally located in their Gurgaon office. It was not accessible from any other locations and could not be converted to a web based application. Security in a web based application was also a huge concern for the customer. Some forms in the application were not in a running position.

Solution

After an analysis of the situation, Path proposed to convert the application at Remfry & Sagar to a web based solution. The same was upgraded to its latest version which is D2K.

Benefits

After the application at Remfry & Sagar was converted to a web based solution, the look and feel was enhanced in a major way. Keeping the security intact, the unused forms were removed and thus the application was made lighter. The upgrade also enabled the forms which were non-functional earlier.

"It's great that we anticipate commencing the Application Testing / Migration (Forms 6i to 11g Forms) as scheduled - please pass my congratulations to all members of your team who made this possible. I have much pleasure in acknowledging completion of UAT (different levels) to achieve the milestone. There was a group of people who constituted the project team, both from Path and us; there has been a tremendous effort from this team to attain this milestone, and the quantum of that effort should not be underestimated. This migration was so smooth! But I know it was just due to your great work dedication. Congratulations to everyone involved."

– Mr. Rakesh Bhardwaj, Sr. IT Manager, Remfry & Sagar Consultant Pvt. Ltd.
